

Small Commercial Service
Schedule SC

Availability

Available to the non-residential customer with monthly demand of 50 kW or less.

Service under this Schedule shall be used solely by the contracting Customer in a single enterprise, located entirely on a single site.

Power delivered under this Schedule shall not be used for resale or exchange or in parallel with other electric power, or as a substitute for power contracted for or which may be contracted for, under any other Schedule of the City, except at the option of the City, under special terms and conditions expressed in writing with the contract with the Customer.

Type of Service

The City will furnish 60-Hertz service through one meter, at one delivery point, at the available voltage.

The type of service supplied will depend upon the voltage available. Prospective customers should determine the available voltage by contacting the City before purchasing equipment.

Motors less than 5 H.P. may be single-phase. All motors of more than 5 H.P. must be equipped with starting compensators and all motors of more than 25 H.P. must be the slip ring type except that the City reserves the right, when in its opinion the installation would not be detrimental to the service of the City, to permit other types of motors.

For Billing Months Energy		Rate
Basic Facilities Charge		\$60.00
Minimum Charge:	Basic Facilities Charge	
	Summer	Non-Summer

All kWh	\$.0755 per kWh	\$.0686 per kWh
<i>All Over 300 kWh per kW Billing Demand Per Month</i>		
All kWh	\$.0650 per kWh	\$.0581 per kWh

Small Commercial Service
Schedule SC

Determination of Billing Demand

At its option, the City may install a demand meter to measure demand for any customer served under this schedule.

The demand charge each month is computed by multiplying the applicable demand rate times the maximum integrated 30-minute demand measured during the month.

The billing demand for computing energy charges each month shall be the maximum integrated 30-minute demand measured during the month, but not less than 30 kW.

Minimum Bill

The minimum bill shall be the basic facilities charge.

Power Factor Correction

When the average monthly power factor of the Customer's power requirements is less than 90 percent, the City may correct the integrated demand in kilowatts for that month by multiplying by 90 percent and dividing the resultant value by the average power factor in percent for that month.

Contract Period

Customers must remain on this Tariff schedule for a period of no less than 12 months before switching tariffs or service unless it is determined by the City that the customer no longer qualifies for this service.

The definitions of "Summer/Non-Summer," "Month," "Determination of Energy," and "Sales Tax" are contained within the General Terms and Conditions and are pertinent to this rate schedule. The General Terms and Conditions Section and the Lexington Utilities Customer Service Policy Manual are an integral part of this tariff.

Medium Commercial Service
Schedule MC

Availability

Available to the non-residential customer whose monthly demand exceeds 50 kW in any three months of the preceding twelve months but is less than 250 kW.

Service under this Schedule shall be used solely by the contracting Customer in a single enterprise, located entirely on a single site.

Power delivered under this Schedule shall not be used for resale or exchange or in parallel with other electric power, or as a substitute for power contracted for or which may be contracted for, under any other Schedule of the City, except at the option of the City, under special terms and conditions expressed in writing with the contract with the Customer.

Type of Service

The City will furnish 60-Hertz service through one meter, at one delivery point, at the available voltage.

The type of service supplied will depend upon the voltage available. Prospective customers should determine the available voltage by contacting the City before purchasing equipment.

Motors less than 5 H.P. may be single-phase. All motors of more than 5 H.P. must be equipped with starting compensators and all motors of more than 25 H.P. must be the slip ring type except that the City reserves the right, when in its opinion the installation would not be detrimental to the service of the City, to permit other types of motors.

Medium Industrial Service
Schedule MI

Availability

Available only to establishments classified as “Manufacturing Industries” by the Standard Industrial Classification Manual, 1957 or later version, published by the Bureau of Budget, United States Government, and where more than 50% of the electric consumption of such establishment is used for its manufacturing processes whose monthly demand exceeds 50 kW in any three months of the preceding twelve months but is less than 250 kW.

Service under this Schedule shall be used solely by the contracting Customer in a single enterprise, located entirely on a single site.

This Schedule is not available for auxiliary or breakdown service. Power delivered under this Schedule shall not be used for resale or exchange or in parallel with other electric power, or as a substitute for power contracted for or which may be contracted for, under any other schedule of the City, except at the option of the City, under special terms and conditions expressed in writing with the contract with the Customer.

Very Large General Service
Schedule VLG

Availability

Available to customers whose monthly demand exceeds 999 kW but is less than 10,000 kW in any three months of the preceding twelve months.

Service under this Schedule shall be used solely by the contracting Customer in a single enterprise, located entirely on a single site.

This Schedule is not available for auxiliary or breakdown service. Power delivered under this Schedule shall not be used for resale or exchange or in parallel with other electric power, or as a substitute for power contracted for or which may be contracted for, under any other schedule of the City, except at the option of the City, under special terms and conditions expressed in writing with the contract with the Customer.

The obligations of the City in regard to supplying power are dependent upon its securing and retaining all necessary rights-of-ways, privileges, franchises, and permits for the delivery of such power and the City shall not be liable to any customer or applicant for power in the event the City is delayed in or is prevented from furnishing the power by its failure to secure and retain such rights-of-way, privileges, franchises, and/or permits.

Type of Service

The City will furnish 60-Hertz service through one meter, at one delivery point, at one of the following approximate voltages where available:

- 3 phase, 120/240 delta volts; or
- 3 phase, 208Y/120 volts, 480Y/277 volts; or
- 3 phase, 3 wire, 240, 480, 575, or 2400 volts, or
- 3 phase, 4160Y/2400, 12470Y/7200, or
- 3 phase voltages other than the foregoing, but only at the City's option, and provided that the size of the Customer's load and the duration of the Customer's contract warrants a substation solely to serve that Customer, and further provided that the Customer furnish suitable outdoor space on the premises to accommodate a ground-type transformer installation, or substation, or a transformer vault built in accordance with the city's specifications.

The type of service supplied will depend upon the voltage available at or near the Customer's location. Prospective customers should ascertain the available voltage by inquiry at the office of the City before purchasing equipment.

Very Large General Service
Schedule VLG

Motors less than 5 H.P. may be single-phase. All motors of more than 5 H.P. must be equipped with starting compensators and all motors of more than 25 H.P. must be the slip ring type except that the City reserves the right, when in its opinion the installation would not be detrimental to the service of the City, to permit other types of motors.

For Billing Months Energy	Rates
Basic Facilities Charge (per metered delivery point)	\$2,500.00
Minimum Charge:	Basic Facilities Charge
Demand Charge:	
All kW	\$13.25 per kW
Energy Charge:	
All kWh	\$.0618 per kWh

Definition of Month

The term month as used in this Schedule means the period intervening between meter readings for the purposes of monthly billings, such reading being taken once a month.

Determination of Billing Demand

The demand for billing purposes each month shall be the maximum integrated 30-minute demand measured during the month.

Determination of Energy

The kWh of energy shall be the sum of all energy used during the current billing month as indicated by watt-hour meter readings.

Minimum Bill

The minimum bill shall be the basic facilities charge, per metered delivery point.

Power Factor Correction

The customer's utilization equipment shall not result in a power factor (PF) at the point of delivery of less than ninety percent (90%) lagging at the time of maximum demand. Should the PF be less than ninety percent (90%) lagging for more than 3 out of any 12 months, the City will notify and require the Customer to install correction equipment to bring the PF into compliance within 24 months.

Very Large General Service
Schedule VLG

Contract Period

Each customer taking service under this rate schedule enters into a contract to purchase electricity from the City for a minimum original term of one (1) year, and thereafter from year to year upon the condition that either party can terminate the contract at the end of the original term, or at any time thereafter, by giving at least sixty (60) days prior notice of such termination in writing: but the City may require a contract for a longer original term of years where the requirement is justified by the circumstances.
